Newsletter July 2024

Dear colleagues worldwide

Today we are sending you a general newsletter for all departments. Take a look at our newly created world map to see how spread out we, as colleagues, trainings and further education programs actually are! It's great for us to see.

IKAM (International Coordination of Anthroposophic Medicine) also networks and works worldwide. For more information, we enclosed the link to the annual report below. Apart from that, we have put together various interesting announcements and are now taking a short summer break.

Hopefully we will meet some of you at the annual conference of the Medical Section at the Goetheanum in September?

In order to receive the newsletter of your specific area of work, please contact the respective coordinator:

Annual Conference of the Medical Section

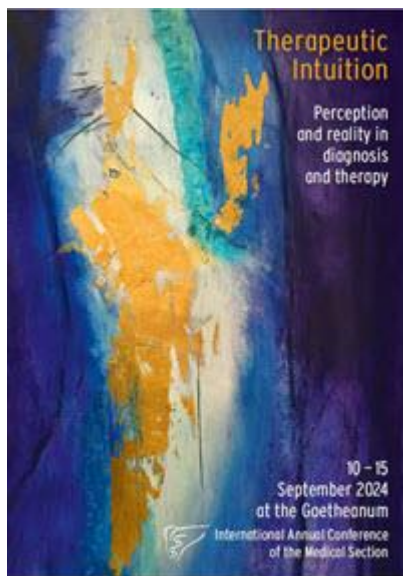

Annual conference of the Medical Section, September 2024

The annual conference of the Medical Section will take place from 10–15 September 2024.

Enclosed is the link to the program, the event page and to the registration as well as to an announcement video which is very inviting and describes the topic in more detail.

Subsequently, you will learn of the work-groups, in particular those which are led by Art Therapists. But of course the work groups of other fields are also very inspiring.

We would be delighted to meet some of you in Dornach in September!

International Specialist Conference Fall 2024

International Conference on Therapeutic Speech and Drama Therapy, October 2024

We cordially invite you to the symposium on speech formation and drama therapy entitled: "Therapeutic Intuition, Source – Word – Action, Therapeutic Resources in the Dramatic Course".

It will take place from October 16–19, 2024 at the Goetheanum in German, Spanish and English.

We would like to take this opportunity to present the work in the CARE areas once again and invite you to share your valuable experience in the respective areas and make it available.

Multi-professional collaboration is a key focus of the Medical Section's work. To this end, concepts for content-related cooperation, training and teaching, public relations and research are being developed in five areas. These areas of work are orientated towards the current social challenges to which anthroposophic medicine, with its various therapeutic professional groups, can provide an answer.

These colleagues are currently represented in the CARE groups

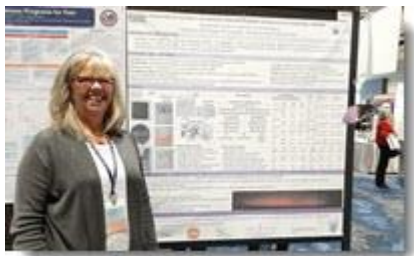

The overview also shows the positions that have not yet been filled. New colleagues are always welcome! If you are interested in working with us, simply get in touch. We will be happy to connect you.
